PROGRESS.

The Life of the Land is Established in Righteousness.

HONOLULU, JULY 14, 1894.

A MAMMOTH STRIKE.

ALL TRAINS IN THE UNITED STATES STOPPED.

A Most Serious Outlook.

The strike of the employees of George M. Pullman the celebrated builder of railroad cars has assumed dimensions which not alone have paralyzed all commerce in the United States, but which threaten to end in bloodshed and riot. The different Labor organizations and railroad unions have taken up the cause of the Pullman strikers and refuse to move any train until the railroad companies agree to disburse with Pullman cars. Extreme measures have been adopted and in California, Illinois and other states the militia has been called out to protect the property of the railroad corporations and to enforce the passage of trains and the carrying of mail. The President has emphasized his authority and has ordered federal troops to interfere a step which has aroused the ire of several Governors who object to what they are pleased to term impertinent interference of the federal government in affairs of the states. The scenes in Chicago are such, though, that the Washington administration feel itself justified in ignoring Governor Altgeld and by this time, very likely, anarchy and riot are running high in Chicago if not conquered with an iron hand.

In the meantime all means of transportation are stopped and farmers and fruitgrowers find themselves without markets and with bankruptcy staring them in the face. It is a gigantic war between labor and capital and it is evident that it will be fought to a finish. The insufficient number of the United States army has been well illustrated during this strike, and the result of the lesson will be that the United States will establish an army in proportion to the size of the country.

The Pacific Cable.

The intercolonial conference now in session at Ottawa devoted several days to the subject of a submarine cable from Queensland to Canada, and came to no practical conclusion on the matter.

The figures which have been given to the press imply that the members of the conference did some pretty tall guessing. They estimated the cost of the cable laid on the sea bottom at \$8,000,000.

No estimate of the cost of a cable from Canada to Australia can possibly be made without a series of elaborate surveys. The conference might just as well have figured on eighty as eight millions. Nor is it possible with our present information to conjecture the cost of maintenance and repairs.

An Impending War.

The Korean question threatens to become very serious indeed. The national enmity between Japan and China, is likely to come to a final issue, and if peaceful advice doesn't prevail a war is unavoidable. The insurrection on Corea has brought the two mammoth powers on the war path. The treaty between them in regard to Corea has been broken, and both are making a most war-like and hostile display. The navies of both countries are built in the height of modern construction, and a sea-battle would furnish a lesson of the greatest advantage to the powers of the earth. It is well understood though that the Japanese are a most superior fighting nation, and that the Chinese would have to depend on their unlimited numerous hordes. There are some possibilities though that the conflict will be settled peacefully, and that the drawing of the sword will be prevented this time. A Russian army is on the frontier of Corea, and the White Czar may probably take a hand in the row. In the meantime the Japanese government have chartered all steamers belonging to the Japanese companies, and no immigration will be allowed until the affairs have been settled.

COMMUNE IN CHICAGO.

Millions of Property Destroyed.

Chicago, July 7.—With flaming torch lawless hordes of firebugs are at work at a score of points in the south half of Chicago. Fires are raging in every direction among the numerous railroad yards, hundreds of cars and tens of thousands of dollars worth of merchandise have gone up in smoke or been carried off by the now frenzied mob of rioters. Incendiarism is rampant, alarm after alarm has followed in quick succession all day, and tonight at 11 o'clock the glare reflected from the heavens shows that the disorderly pastime continues unabated.

Panhandle yards, from Fifty-fifth to Sixty-third street, are on fire. The tracks, contained from 1000 to 2000 cars, half of them loaded, will a total loss. No water being at hand, the fire must burn itself out. The Panhandle station at Sixty-third street was also fired and destroyed.

About eighty cars were burned altogether in the Illinois Central yards and tonight at 10 o'clock the flames were yet smoldering, but no further spread of the fire at this point was feared.

The Grand Trunk yards at Elston is a sea of flame. Five hundred boxcars are supposed to have been burned, and efforts to check the flames have been futile.

When directing the movements of the Eleventh Battalion at Fifty-first street Fire Marshal Fitzpatrick was seized by the thoroughly frenzied mob of firebugs and thrown into a pond, from which he was rescued by the police more dead than alive. Everything at this point will probably be a total loss.

At Hyde Park, near the World's Fair grounds, ashes of forty cars are now smoldering, and word has just come in that, after numerous efforts, the mob has succeeded in firing the Illinois Central shops at Burnside.

The loss in the Panhandle yard alone is estimated at \$1,200,000. The first detachment of the National Guard reached Kensington at 8:30 o'clock.

The people lined up along the tracks where the troops were leaving the cars, and the citizen soldiers were received with shouts of derision and disparaging cries.

Death of S. N. Castle.

S. N. Castle, one of the oldest and most respected citizens of Honolulu passed peacefully away this morning, after a short illness at his residence on King street. The deceased arrived here in the forties as business manager of the American mission, and later on with Amos Cooke, founded the flourishing firm of Castle and Cooke, which do business as sugar factors, commission agents, and dealers in Hardware, etc. During his long residence here, Mr. Castle was always noted for his honesty and independence of opinion, and he was always found to the fore whenever any subject of interest to the country was the question of the hour. The deceased has raised a prosperous and prominent family, among whom the best-known are his sons William, George and Henry. For several years Mr. S. N. Castle took no active part in the management of his business, but lived a quiet and retired life, keenly following though the events in this his adopted country. A large number of business houses closed their offices this morning, out of respect for the deceased. The bereaved family has the sympathy of the whole country.

LATEST NEWS.

New York, July 5. The Popolo Romano states that the authorities are in possession of proofs of an anarchist plot against Premier Crispi of Italy, President Carnot of France, the Czar of Russia and other heads of European Governments. The same paper states that all these were to have been killed in the same week.

Paris, July 5. M. Burdeau was today elected President of the Chamber of Deputies. The vote was: Burdeau, 259; Brisson, 157; scattering, 33.

Hunter's Quay (Firth of Clyde) July 5. The regatta of the Mudhook Yacht Club today opened amid a scene of excitement, which was soon intensified by a collision between the Valkyrie and the Satanita which resulted in the sinking of the former yacht and in seriously disabling the latter.

London, July 5. The Valkyrie is insured in Lyons for £12,000. When the question of time allowance has been settled it is expected that the Britannia will be shown to have won by three and a half minutes.

Victoria, B.C., July 5. A passenger by the Empress states that just before the ship left Yokohama it was reported that Commander Niico, attache of the legation at Juenchan Corea, and a Japanese newspaper correspondent who accompanied him on the trip had been murdered by Chinese soldiers. Great excitement was created in Yokohama.

HAWAIIAN HARDWARE COMP'Y

The Advertiser who catches a persons eye usually wins a customer. Many different styles of advertising have been adopted and with more or less success, by the believers in the use of printers ink. The manufacturers of Pears Soap, for instance, occasionally buy paintings that have been on exhibition in the Paris Salon and have lithographs made from them for the purpose of bringing their product before the people. In addition to such side issues, Pears spends hundreds thousands of dollars annually among the newspapers and magazines. Some years ago the Agents of certain article on sale in New York made a hit in advertising by having on Broadway during business hours two fatuously dressed Negroes wearing very high collars, on the backs of which was printed "Use Smiths Pills." The idea was novel and the public caught on. Rising Sun Stove Polish has been kept before the public for years through persistent, and sometimes expensive advertising. Twenty odd years ago the manufacturers of this polish started half a dozen men across the ornament to paint signs on rocks and fences. The Aermotor Co., of Chicago have increased its sales more than five hundred per cent in two years by the use of printers ink. We believe we have been instrumental in increasing the sales of the Aermotor by keeping everlastingly at it in Hawaii.

We do not wish to say that advertising will sell any manufactured article; there is no use spending money in advertising "cheap and nasty" goods because the people will not be hoodwinked. If Haviland China was not the superior article it is, all our advertising of it would not have sold the thousands of pieces that we have. We simply call the attention of the people to it and its superior quality is apparent to the customer directly a piece of it is examined.

Printers ink has helped the sale of the James Locked Fence but it would not have done so if it had been as flimsy as the ordinary wire fence. First, the economy there is in building it recommends it to the plantation manager and then its durability clinches the sale. If the stays and washers cost as much as an ordinary redwood post our sales of the material would not have reached such enormous proportions.

Our average sale of the Pansy Iron Stove is about two a day the year round. If was not the best iron stove on the market we would not sell that many in six months. Advertising is the tip to the public the good points in the article sells it just as the good qualities of the Fischer Steel Range make it a desirable article for people who wish to economize in the use of fuel.

We buy only what has proven good after people in the United States or Europe have given it a trial; we profit by their experience if the articles are good we buy and sell them; if they are poor we steer clear of them. When we advertise an article it is to attract attention to it; the newspaper is the button we push, the salesman does the rest.

Persistent advertising coupled with the article being a superior one has sold thousands of the Frank Walcott Emory File. If it had been no better than an ordinary scythe stone we probably would not have sold twenty. When a man finds out that his table knives may be kept sharp at all times at an expense of fifty cents and a very little elbow grease he is quite willing to try the experiment.
